

How Do I Fill My Prescription?

You're an important part of the process to fill and receive your prescription. Although this medication can be filled by both retail pharmacies and specialty pharmacies, your insurance provider and plan will determine where your prescription is filled.

Getting a prescription filled may take time. Follow these steps to help you keep track of your prescription's progress. *Check a box for each step as it gets completed.*

What Can I Do to Help Keep the Process Moving?

The prescription process can vary from person to person. *Here are some tips to help you minimize delays.*

<p>Confirm Where Your Prescription Was Sent With Your Healthcare Provider's Office and save the information</p>	<p>Sign Up For Savings & Support Information Call 1-844-935-5269</p>	<p>Keep In Touch Respond promptly when the pharmacy contacts you for important information</p>
	<p>Check In with your pharmacy or healthcare provider's office if you haven't received your medication after 2 weeks</p>	<p>Be Proactive to avoid interruption in treatment</p>

Ask the pharmacist. These questions may help you prepare for future refills:

- Will my Co-Pay Savings Card information (if eligible) be saved or will I need to provide my information each time I fill a prescription?
- Will I have enough medication supply on hand until the next visit with my healthcare provider? Make sure to speak with your healthcare provider in advance of refills running out to avoid any interruptions in treatment.
